Work experience

Product Manager, Rute INC   [more info]
Remote   **April 2024 – Current**

Technologies: Atlassian Jira, Atlassian Product Discovery, Google Workspace, Figma, Miro

Experience: Led three product initiatives in a startup environment, with full ownership of one core project from discovery to launch. Oversaw a cross-functional team of over 25 people, including frontend, backend, QA, and design.

Defined the product roadmap, set priorities, and coordinated releases while optimizing workflows and improving team efficiency. Worked closely with beta testers—presenting features, gathering feedback, and converting insights into actionable items.

Defined team roles, established internal processes and a rulebook, and was responsible for hiring, performance monitoring, and making key team structure decisions.

Technical Project Manager, Better Collective   [more info]
Niš, Serbia   **July 2023 – October 2024**

Technologies: Monday.com, Jira, Confluence, Trello, Mural, Miro

Experience: Leading 2 agile teams, my responsibilities included creating roadmaps, writing tasks, prioritizing, and discussing goals with stakeholders.

Team 1 consisted of 4 developers and was working with WordPress, creating custom templates for displaying and tracking affiliate links, as well as developing a web application for managing and setting affiliate links and banners.

Team 2 comprised 7 members (5 developers, 1 QA, and 1 Designer) and was responsible for developing a web application using React to manage banners and modals on web pages.

Scrum Master, Better Collective   [more info]
Niš, Serbia   **June 2021 – July 2023**
Technologies: Monday.com, Jira, Confluence, Trello, Mural, Miro
Experience: I was a Scrum Master leading two agile teams using the Scrum framework. Each project had its own Product Owner.

Team 1 consisted of 5 developers and Product Owner. The team was tasked with developing an API and web interface for mapping affiliate links with tracking links. Links with trackers were served over the API.

Team 2 consisted of 4 developers and Product Owner. Their objective was to develop an API and web interface for creating banners and modals to serve affiliate links from partners.
